Slot reader	158,67
Mouse and keyboard	30

Total 1383,67

Computer:

Make sure you have plenty of RAM memory, **windows xp**, and that your technician sets you up with a quick setup recovery disk (ghost). Also you may want to have it done in RAD 1.

Approximately \$ 950.00

Slot reader:

PS2 Barcode Slot Reader
Your front desk will use this to assign Wellbeing cards to your patients

Available on line:
<http://www.google.com/products?q=slot+barcode+reader>

PS2 Barcode slot reader \$ 158.67

Monitor:

We recommend a larger monitor to ease the eyes and optimize appointment management.

19" Monitor \$ 189.99

Keyboard and mice

Consider battery back ups for wireless keyboards and mouse.

Wireless keyboard & mouse set
\$79.99

Label printer

This will be useful to print labels for x-rays and actual paper file. You will also use this to print labels for your outgoing mail.

Web Cam

This is essential to add patient pictures to their electronic file. However, it is not necessary to purchase really expensive models.

Digital Camera

This is essential if you are planning on digitizing your films. You don't really need a high priced one. Low resolution pictures are sufficient for a great result. We recommend 800X600 pictures for all films.

Canon digital camera \$ 239.00

UTMA 17" Touch Monitor

This 17" touch monitor has a built in Thin client module that allows you to connect to a host PC. This affordable sturdy touch screen actually replaces a computer. **Always use PS2 Mouse, keyboards and barcode slot readers with these units. Also available in 19" (highly recommended)**

Order it online: <http://www.touchtronix.com/products/relaytouch-utma-17d.html>

UTMA 17" touch Monitors \$1295

Ncomputing N200 Station

This unit replaces a computer. It is a terminal unit that connects to a host pc via a regular network connection. Run up to 10 of these units with one computer. They are simple to set up and never require maintenance.

Always use PS2 Mouse, keyboards and barcode slot readers with these units.
